

In this section, we will cover the following:

- UI automation and data scraping
- File systems/directory automation

At the end of this section, you will have the necessary understanding of automation concepts and activities to start building robots in UiPath.

TIP: Try doing whatever Truls is doing in UiPath on your own computer to get even more familiar with the concepts and activities. This will enhance your learning and improve your chances of successfully building the robots in the upcoming sections!
